AutoCAD Cracked 2022 Latest Version has long had an API with COM objects, which are extensions of the API for programmers. This was originally called the Accelerated AutoLISP (AAL) API, and later the Visual LISP (VLS) API, which was a collection of functions that converted between the two modes. Autodesk then ported this API into VBA and later to Microsoft's .NET programming language. Originally, the AutoCAD Crack For Windows API was based on programming with LISP. The first program to use it was the T-1000 Replicator. AutoCAD Cracked Accounts 7.0 introduced a new API based on the ObjectARX library. This API is called the ObjectARX API. This API is available to anyone, regardless of their programming language. AutoCAD Crack Keygen's COM components are built on top of this.
